Intro

Capital Steel Buildings offer a complete domestic range of garage, carport and awning solutions to suit all budgets and design requirements. Our aim is to ensure we have a solution for every situation.

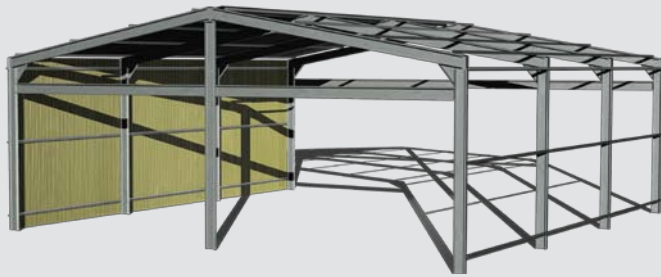

Our range extends well beyond the traditional vertical Colorbond clad garage, offering horizontal Hardies cement fibre claddings and blue board with rendered or texture coated finishes. We can even supply eaves on our buildings.

If you are looking to update your existing garage, or add value to your home with the addition of a new garage then Capital Steel Buildings are confident they will have a solution to your needs.

Key Elements

Capital Steel Buildings structures are the most robust portal frame buildings available on the market.

As a matter of principle, CSB employ the

1. Wider Domestic Building Spans

CSB domestic garages range from 3m to 9m wide and up to 3.6m high. Even the bay widths are wider with a maximum of 4m wide which ensures less bays are required for longer buildings.

2. Variable Roof Pitches

CSB offer the choice of a 10, 15 or 20 degree roof pitch on the entire domestic building range. The portal frame rafter design provides additional head room, making it ideal for maximising internal storage space.

3. Fully Customisable Design Options

Customers can customise any CSB building to suit their design requirements. Buildings can be designed to any size and a full range of standard and unique optional features are available to provide those creature comforts.

4. Fully Bolted Portal Frame Connections

Every CSB portal connection is fully bolted with high tensile M12 or M16 portal bolt sets for optimal strength. Knee braces are pre cut and punched using a unique bracket system. It is a simple bolt together system which simplifies the installation process.

5. Pre Cut and Punched Portal Members

All portal members are pre cut and punched to the exact size and position for ease of installation.

services of industry leading engineers to design and test the entire range of CSB structures to ensure there is no compromise in quality and strength.

6. Folded Portal Frame Connectors

The entire range of CSB portal frame connection brackets have been accurately designed and folded to increase bracing strength at each connection point. Each bracket is pre punched to match the column and rafter punching for ease of installation.

7. Superior Choice Of Finishes

CSB offer an extensive range of external cladding options to enable customers to match the structure to their existing surroundings.

8. Minimum C150 Portal Member Sizes

CSB specify C150 (6 inch) portal member sizes as a minimum requirement in their entire range to maximise strength.

9. Site Specific Design Specification

CSB design each structure specific to its proposed location to ensure the correct wind, usage and shielding factors are applied for optimal strength.

10. BlueScope Lysaght Products as Standard

All CSB structural components are supplied through BlueScope Lysaght to ensure quality and strength are not compromised.

Affordability

In comparison to other conventional forms of building, such as bricks and mortar, CSB structures are extremely cost effective and affordable. The light weight composition of the buildings reduce production and installation costs.

Versatility

With a range of buildings to suit every application, CSB can ensure they have a solution to suit every customer's needs.

CSB offer a range of unique product features which allow buildings to be customised beyond the conventional steel box most garage companies supply.

Quality

All CSB materials are Australian made with full manufacturers warranty up to 15 years. CSB only employ the services of licensed contractors to ensure quality of workmanship is maintained.

Strength

As a matter of principle CSB will not compromise on strength. CSB structures are engineered site specific to comply with the mandatory Australian building codes and regulations. CSB are continuously conducting extensive testing on their buildings to ensure that they remain at the forefront of the steel building industry.

Options

*CSB offer the following **STANDARD** options:*

- Roller Doors
- Windows
- Skylights
- Roof Vents
- PA Doors
- Lean-tos
- Garaports
- Mezzanine Floors and Stair Cases
- Sliding Doors
- Partition Walls
- Insulation
- Vermaseal
- Automatic Door Openers

*CSB offer the following **UNIQUE** options:*

- Front, Back and Side Eaves
- Stable Bay Systems
- Rendered Blue Board Finish
- Horizontal Wall Claddings
- Decorative Door Corners
- Stud Wall Systems
